

# SORTATION, TESTING, REWORK AND RECLAMATION

Hi-Pot, Surge, Resistance and Continuity Testing

Daily shipments available to prevent line down

Custom designed gauges, fixtures and rework tools

## What We Do:

- Quality containment and complaint response for customer returns, in-process escapes, and supplier quality issues.
- Incoming inspection overflow support, dock audits, and receiving inspection surge capacity when your team is overloaded.
- Rapid sortation and inspection using 100% inspection or AQL sampling to your control plan.
- Defect identification and documentation with standardized defect codes, photos, counts by defect type, and lot traceability.
- Electrical and functional test support based on your requirements using your fixtures or RELY-built test setups.
- Rework and recovery to approved work instructions and engineering disposition, then re-tested and repackaged for release.
- Reclamation services including disassembly, component recovery, and return-to-stock prep.
